Floreysoft Shared Contacts

Contact Management Solutions for Google Apps

Sharing contacts should be more than a global address book under the exclusive control of an administrator. Let users share contacts in groups or across the entire organization, using the same screens and tools they use to manage their personal contacts. Easy. Seamless. Efficient.

More than a Global Address List

The Global Address List, or GAL, within Google Apps includes all email addresses within your domain. You can add other addresses, but this requires administrative access and special tools.

Floreysoft Shared Contacts gives you more. Not only can you create multiple address books of shared contacts, you can manage which users can view and modify contact records. You have no limits on the number of address books, users, or contacts you manage.

End User Easy

To your users, Shared Address Books have the look and feel of Groups on the Google Apps Contacts screen. Users do not need a third party tool or special instructions to view and, if granted permission, modify contact information.

Go Mobile

Unlike the GAL, Floreysoft Shared Contacts let you seamlessly synchronize shared address books and contacts to your iPhone, Blackberry, and Android devices.

Simple Administration

No need to mess with import files and APIs, Floreysoft Shared Contact gives administrators a simple, intuitive screen for creating address books, controlling access, and managing contacts.

Secure Integration

Running on the Google App Engine, Floreysoft Shared Contacts runs securely within your Google Apps domain. Floreysoft never shares you contacts with any third party.

The Power of Google App Engine

Floreysoft Shared Contacts runs on the Google App Engine within your domain. Your contacts remain private and secure.

Seamless Integration

Floreysoft Shared Contacts runs seamlessly within your Google Apps environment. You manage the service from the Google Apps Control Panel.

Value Add Services

Installation & Support: Let Cumulus assist you with a "best practice" configuration, your initial setup, and on-going operational support.

Cumulus GlobalSM helps small and mid-size businesses, non-profits, governments, and educational institutions thrive by delivering cloud computing solutions. We align technology with our clients' goals, objectives, and bottom lines. We leverage our expertise, vendor relationships, and a diversified range of best-of-breed cloud services to create custom solutions with tangible value.
