Google Message Encryption

Automatic Encryption for Sensitive Email Communications and Compliance

Business requirements, industry regulations, and government mandates increasingly dictate that your organization must secure email traffic.

Google Message Encryption (GME) is a cost-effective solution that works with your in-house email server as well as with Google Apps.

On-Demand Message Encryption

Google Message Encryption (GME), powered by Postini, provides message encryption for your organization to securely communicate with business partners and customers according to security policy or on an "as needed" basis.

Without the complexity and costs associated with legacy on-premises encryption technologies, GME keeps operating costs low.

Beyond Compliance

In addition to helping you comply with GLBA, HIPAA, PCI DSS and data privacy regulations, you benefit from:

- Secure messaging between business partners, customers, or individuals without any additional software, hardware, or technical training
- Automatic enforcement of organizational email encryption policies based on individuals, groups, or specific message content
- User-initiated encryption for confidential messages to any email recipient
- Auditable protection of emails containing regulated or company proprietary information
- Centrally-managed security policies and reporting

Delivery Options

GME customers of all sizes can elect for inbox delivery of encrypted messages.

GME customers with more than 100 mailboxes can elect to setup a branded secure message portal.

Value Add Integration

Google Message Encryption is available as an add-on to Google Message Security (GMS).

The service fully integrates with Message Archive & Discovery services.

Compatibility

Google Message Encryption is fully compatible with Google Apps and most in-house email systems.

Value Add Services

Archive & Discovery:

Compliance with up to 10 years retention.

Small Business Support:

Cumulus Global has GME solutions for businesses with fewer than 100 mailboxes.

Best Practice Support:

Let Cumulus lead you through "best practice" setup, and help you support your users.

As a trusted Google Enterprise partner, Cumulus GlobalSM helps small and mid-size businesses, non-profits, governments, and educational institutions thrive by delivering cloud computing solutions. We align technology with our clients' goals, objectives, and bottom lines. We leverage our expertise, vendor relationships, and a diversified range of best-of-breed cloud services to create custom solutions with tangible value.
